Description

{tab Product Description}

ApiCandy PROTEICO

- *Produced from non-genetically modified sugars.*
- *FREE FROM all starches, chemical additives and bleaches.*
- *Ideal for all year round nutrition, remains soft for easy feeding even during low temperatures.*

ApiCandy PROTEICO is a carefully formulated fondant based bee feed made from a blend of non-genetically modified (beet) sugars and protein sourced from inactivated brewers yeast.

Made from 100% non-animal sourced products, ApiCandy Proteico is easily digested and palatable for bees.

Ideal for stipulating early production in spring contains protein which acts as a stimulant to promote egg laying.

Can also be used during Autumn and Winter, as a supplement for feeding during periods of bad weather and breaks in natural food availability.

ApiCandy can be utilised in a number of different ways:

- Placing directly onto brood frames

Emptied into an alternative feeder
Slitting the package open and placing above a crown board feeder hole.
